Redzonecats records to February 2019

Cats from December 2017 onward are shaded yellow

Key
- **Reclusive** = only seen on camera
- **Unapproachable** = seen but cannot be approached outdoors
- **Approachable** = allows physical contact
- **Tourist** = has home but spends hours/days/weeks in the red zone

Social: has learned to associate confidently with humans. See notes.
- **Note 1**: after a period of homelessness, rehabilitation may be required
- **Note 2**: many social cats present as unsocial for 1-4 days after trapped

Pre-social = socialised rapidly once human contact commenced

Adopted = placed in a home for the first time
Rehomed = placed in a new home
Repatriated = returned to original home
Entire male = not desexed (i.e., a tom)

Veterinary care: All general veterinary care, dental work and nose cancer surgery completed before placement.

Column A numbers show the order in which cats entered shelter

Some vet files have been transferred out of the redzonecats account - i.e. when the new owner is a McM&H client

Cat No.	Cat name/ID	Colour/coat/other	Trapped by	Vet	Date trapped	Sex	De-sexed	Collar	Chip	Feline aids virus SNAP	Feline leukemia virus SNAP	Feline leukemia virus PCR[2]	Identified lost & tourist	Outdoor behaviour	Indoor behaviour first 24 hrs	Already social? assessed day 2 to 5 or by default if ID'd	Outcome: Euthenised, reason shown; Other outcomes	Background notes: Cats are identified where possible via online lost and found adverts, microchips, and sometimes also flyers and door-knocking (where appropriate)	Surgery (extra to desexing) Ext = extractions rem = removed	Cat No.
