

Redzonecats records to July 2016

		Key										Social:			Adopted:			Veterinary care:				
		Reclusive = only seen on camera										has learned to associate confidently with humans. See notes.			placed in a home for the first time			All general veterinary care, dental work and nose cancer surgery completed before placement.				
		Unapproachable = seen but cannot be approached outdoors										Note 1: after a period of homelessness, rehabilitation may be required			Rehomed = placed in a new home							
		Approachable = allows physical contact										Note 2: many social cats present as unsocial for 1-4 days after trapped			Repatriated = returned to original home							
		Some vet files have been transferred out of the redzonecats account - i.e. when the new owner is a McM&H client										Tourist = has home but spends hours/days/weeks in the red zone			Pre-social = socialised rapidly once human contact commenced			Entire male = not desexed (i.e. a tom)				
Column A numbers show the order in which cats entered shelter		Cat name/ID	Colour/coat/other	Trapped	Vet	Date	Sex	De-	Collar	Chip	Feline aids		Feline leukemia		Identified	Outdoor	Indoor behaviour	Already social?	Outcome	Background notes		
																			Euthenised, reason shown			
																			Cats are identified where possible via online lost and found adverts, microchips, and sometimes also flyers and door-knocking (where appropriate)			
																			Other outcomes
